Professional Summary

MSc-qualified Data Analyst with 3+ years of experience using Power BI, SQL, and Python to build scalable reporting, model business data, and deliver executive-ready insight. Strong track record in semantic modelling, dashboard development, KPI design, and stakeholder partnering across complex commercial environments. Built reconciled reporting layers, improved self-serve analytics, and translated fragmented datasets into decision-ready reporting that reduced manual analysis and accelerated business decisions.

Work Experience

A2Dominion Group, *Insight Analyst*, London, UK Nov 2024 – Jan 2026

- Business Case Development:** Authored and presented a data-driven business case directly to the CFO, quantifying the cost of legacy manual workflows and securing executive buy-in and investment in modern data tooling.
- Semantic Modelling:** Engineered a scalable star-schema Power BI model consolidating fragmented legacy datasets into a reconciled reporting layer, enabling CFO-level reporting with 100% reconciliation accuracy and reducing ad-hoc data requests by 75%.
- Proactive Analytics:** Spearheaded a data science initiative to shift from reactive to proactive complaint management, operationalizing an XGBoost risk model into an intuitive Power BI traffic-light dashboard guiding interventions.
- Stakeholder Partnership:** Acted as analytical partner for multiple business units, translating complex commercial questions into insights and presenting findings to senior stakeholders across finance, operations, and board level.
- Process Improvement:** Identified and quantified cost of manual workflows, driving process improvements that shifted finance team's time from operational reporting toward higher-value analysis by 25%.

JD Sports Fashion, *Insight Analyst*, London, UK Sep 2023 – Nov 2024

- Root-Cause Analysis:** Interrogated large-scale web datasets with SQL to identify checkout drop-off drivers across omnichannel journeys, uncovering actionable friction points that informed digital optimization targeting a 5% uplift in key conversion steps.
- Performance Investigation:** Conducted deep-dive variance analysis on weekly and monthly performance shifts, identifying root causes of sales movements and anomalies across 220+ locations and online channels.
- Customer Segmentation:** Leveraged Python and SQL to conduct customer segmentation and cohort analysis, identifying high-value, underserved demographics that informed targeted marketing campaigns.
- Power BI Development:** Developed automated Power BI dashboards tracking net sales, returns, and margin leakage by region, enabling managers to diagnose performance issues faster and improve markdown and trading decisions.
- Seasonal Modelling:** Modelled revenue impact of major promotional events and seasonal factors using Advanced Excel and SQL, producing forecasts that informed financial planning and inventory decisions.

Projects

Sales Pipeline Analytics Dashboard [GitHub](#) | May 2026

- Pipeline Analytics:** Built an end-to-end Python and SQL analytics pipeline tracking pipeline health, win rates, and revenue forecasts, then deployed a Streamlit dashboard that gave stakeholders self-serve visibility into funnel performance and conversion risk.

Alternative Data Underwriting & Credit Risk Platform [GitHub](#) | May 2026

- Credit Risk Analytics:** Engineered an end-to-end analytical pipeline assessing credit risk using behavioral signals, designed a dual-model architecture separating risk drivers, built SQL database for operations, and delivered actionable insights on lending expansion strategy.

Education

Queen Mary University of London, *MSc Big Data Science*, London, UK Sep 2022 – Sep 2023

University of Mumbai, *BEng Electronics & Telecommunication Engineering*, Mumbai, India Jun 2018 – Jun 2022

Technical Skills

Analytics & Visualization	Power BI (Advanced DAX, Star Schema, Semantic Modelling), Tableau, Looker, Metabase, Advanced Excel
Programming & Query Languages	Advanced SQL (T-SQL, BigQuery), Python (Pandas, NumPy, Scikit-learn), DBT
Data Analysis Methods	Funnel Analysis, Cohort Analysis, Variance Analysis, Seasonal Analysis, Segmentation, Predictive Modelling, Statistical Analysis
Cloud & Platforms	Azure (Synapse, Functions), GCP (BigQuery), Power BI Semantic Models, Data Lake Design, Git
Business Delivery	Stakeholder Management, Requirements Gathering, Data Storytelling, Executive Reporting, Root Cause Analysis, Commercial Insight
