Professional Summary

MSc-qualified Data Analyst with 3+ years of experience translating commercial problems into structured analytical investigations using SQL, Python, and BI tools. Proven track record in root-cause analysis, performance diagnosis, dashboarding, and stakeholder storytelling across retail and housing environments. Partnered with senior business leaders to turn messy datasets into clear recommendations, scalable reporting, and measurable operational and commercial improvements.

Work Experience

A2Dominion Group, *Insight Analyst*, London, UK

Nov 2024 – Jan 2026

- Business Case Development:** Authored and presented a data-driven business case directly to the CFO, quantifying the cost of legacy manual workflows and securing executive buy-in and investment in modern data tooling.
- Analytical Transformation:** Engineered a scalable star-schema Power BI model consolidating fragmented legacy datasets, enabling CFO-level reporting with 100% reconciliation accuracy and reducing ad-hoc data requests by 75%.
- Proactive Analytics:** Spearheaded a data science initiative to shift from reactive to proactive complaint management, operationalising an XGBoost risk model into an intuitive Power BI traffic-light dashboard guiding interventions.
- Client-Style Problem Solving:** Acted as analytical partner to multiple business units, translating ambiguous commercial questions into structured analysis and presenting decision-ready recommendations to senior stakeholders across finance, operations, and leadership.
- Process Improvement:** Identified and quantified the cost of manual workflows, driving process improvements that shifted the finance team's time from operational reporting toward higher-value analysis by 25%.

JD Sports Fashion, *Insight Analyst*, London, UK

Sep 2023 – Nov 2024

- Root-Cause Analysis:** Interrogated large-scale web datasets with SQL to identify checkout drop-off patterns across omnichannel, generating insights that informed digital optimisation targeting a 5% uplift in key conversion steps.
- Business Diagnostics:** Conducted deep-dive variance analysis across 220+ locations and online channels, identifying root causes of sales shifts and anomalies to support faster commercial decision-making.
- Customer Segmentation:** Leveraged Python and SQL to conduct comprehensive customer segmentation and cohort analysis, identifying high-value, underserved demographics that informed targeted marketing campaigns.
- Dashboard Storytelling:** Developed automated Power BI dashboards tracking net sales, returns, and margin leakage by region, enabling managers to quickly diagnose root causes of performance issues and act on findings.
- Commercial Modelling:** Modelled revenue impact of major promotional events and seasonal factors using Advanced Excel and SQL, producing forecasts that informed financial planning and inventory decisions.

Projects

Sales Pipeline Analytics Dashboard

[GitHub](#) | May 2026

- Decision Intelligence:** Built an end-to-end Python and SQL analytics pipeline tracking pipeline health, win rates, and revenue forecasts, then deployed a Streamlit dashboard giving stakeholders self-serve access to actionable performance insights.

Alternative Data Underwriting & Credit Risk Platform

[GitHub](#) | May 2026

- Credit Risk Analytics:** Engineered an end-to-end analytical pipeline assessing credit risk using behavioural signals, designed a dual-model architecture separating risk drivers, built an SQL database for operations, and delivered actionable insights on lending expansion strategy.

Education

Queen Mary University of London, *MSc Big Data Science*, London, UK

Sep 2022 – Sep 2023

University of Mumbai, *BEng Electronics & Telecommunication Engineering*, Mumbai, India

Jun 2018 – Jun 2022

Technical Skills

Programming & Query	Advanced SQL (T-SQL, BigQuery), Python (Pandas, NumPy, Scikit-learn), DBT
Analytics & Visualization	Power BI, Tableau, Looker, Metabase, Advanced Excel
Analysis Methods	Funnel Analysis, Cohort Analysis, Variance Analysis, Seasonal Analysis, Segmentation, Predictive Modelling, Statistical Analysis
Business Delivery	Stakeholder Management, Requirements Gathering, Data Storytelling, Executive Reporting, Root Cause Analysis, Commercial Insight
Cloud & Platforms	Azure (Synapse, Functions), GCP (BigQuery), Power BI Semantic Models, Data Lake Design, Git
